OBJECTIVES OF THE FDP

The basic objective of the FDP is to promote and encourage the development of recent software engineering and soft computing techniques among the software engineers, academicians, researchers and practitioners. The FDP on “**Emerging Research Trends in Information and Communication Technology**” will provide a forum to encourage and exchange of ideas, techniques and experiences. This aims is to bridge the research gap between the industries and academia. The FDP comprises the discussion of soft computing techniques, evolutionary algorithms, deep learning, machine learning, big data analytics, software engineering, statistics, modelling simulation, internet of things, block chains, cloud computing, wireless sensor networks, quality of services, computer assisted education, bioinformatics, ICT in human life and hands on experience on tools.

ABOUT THE UNIVERSITY

Gautam Buddha University, established by Uttar Pradesh government in 511 acres lush green campus at Greater Noida encourages multidimensional growth through its education, training and research. The University envisions becoming a world class centre for excellence in education and research. The academic programmes, designed in line with the best universities around the world, combine the best practices of pedagogy and class room teaching, complemented by practical training and experiential learning. In order to promote value-based education, research and training, the University has established eight schools. To cater the engineering disciplines; School of Information and Communication Technology and School of Engineering offers graduate, post graduate and doctoral level studies of the branches of Engineering and Technology including interdisciplinary domains. In terms of infrastructure the University can boost of having world class facility.

SCHOOL OF INFORMATION AND COMMUNICATION TECHNOLOGY

School of Information and Communication Technology aims to produce graduate, postgraduate professionals in the emerging areas of Electronics & Communication Engineering, Computer Science & Engineering and Information Technology. The school has well trained and research oriented faculty members. It offers graduate, post graduate programme as well as Doctoral programme with modern and state of the art laboratories.

RESOURCE PERSONS

Eminent persons from the academic institutions, universities, research organizations and from the industries will be invited to deliver sessions on soft computing techniques, evolutionary algorithms, deep learning, machine learning, big data analytics, software engineering, statistics, modelling simulation, internet of things, block chains, cloud computing, wireless sensor networks, quality of services, computer assisted education, bioinformatics, ICT in human life and hands on experience on tools.

TARGET AUDIENCE

The faculty development program “Emerging Research Trends in Information and Communication Technology” is planned to impart one week training program for the academicians, scientist and research scholars of Engineering Institution / University / R & D laboratories who are working in the field computer science & engineering and electronics and communication engineering.

REGISTRATION FEE

Participants like Faculty Member, Students, Research Scholars and Scientist from Engineering Institution / University / R & D laboratories/ Industry: Rs. 3000/-

Registration will be done on first come first served basis. As the number of seats is limited to 40, early registration is recommended. The registration fee should be paid in the form of Demand Draft drawn in favour of “**Gautam Buddha University**” payable at Delhi and to be sent along with the registration form.
